## OBJECTIVE

---

A proactive and detail-oriented recent graduate with a focus on Full Stack Web Development. Skilled in HTML, CSS, Bootstrap, JavaScript, Core Java (JSE) and MySQL, proficient in designing, deploying responsive and interactive web applications. Committed to ongoing professional development with a strong ability to adapt to emerging technologies and frameworks. Eager to leverage my technical skills and passion for innovation to deliver robust solutions as part of a collaborative team in the fast-paced world of web development.

## MINI-PROJECT

---

### Portfolio

Designed and developed a comprehensive portfolio website to showcase professional achievements, skills and projects with a meticulously designed user interface created by me for providing a visually appealing and informative overview of my expertise. ([Try it here](#))

## PROJECT

---

### Fraud Detection on E-Commerce using Machine Learning Techniques

Developed a robust fraud detection system for e-commerce platforms leveraging advanced Machine Learning Algorithms. The project involved the analysis of transactional data to identify patterns indicative of fraudulent activities. Implemented techniques such as Random Forest, decision trees and Voting Classifier to accurately classify and predict fraudulent transactions.

This system enhances the security and integrity of online transactions, protecting both consumers and businesses from potential fraud.

## CERTIFICATIONS

---

### Internship on Web Development and Design

A 6 months internship to developed strong skills in HTML, CSS, JavaScript and gained experience with design principles and cross-browser compatibility issues.

## INTERESTS

---

Learning new Technologies  
Blogging with Blogger
